S U B J E C T: COVID-19 Notification

Dear LifeStream Family,

Since the beginning of this unprecedented pandemic, we committed to keeping you informed when LifeStream had a confirmed case of COVID-19 in one of our communities.

We were informed on Friday, April 24th that a Resident at our LifeStream at Thunderbird community was diagnosed with COVID-19 and was quite ill. Shortly after we notified our Residents and Associates at that community of her positive diagnosis, sadly, we were then informed that she had passed away.

We continue to communicate with our Residents, families and Associates at Thunderbird about monitoring their own health. We are working with Maricopa County Public Health to provide support to our Residents and Associates as needed.

From the beginning, our number one priority has been, and will continue to be, the safety and well-being of our Residents and Associates. We remain committed to keeping our communities informed and protected. This was our first known diagnosis and passing due to the COVID-19 virus. Please join us in praying for her family's comfort during this difficult time.

For more information, and continued updates, please visit our website at www.LifeStreamLiving.com/coronavirus

Sincerely,

Ron Estes,
President & CEO
