S U B J E C T: Update on Resident Visits

Updates

Earlier today, Maricopa County issued updated guidance on visitation. The guidance now aligns with Arizona Department of Health Service's (ADHS) guidance requiring two full rounds of weekly testing following any known COVID-19 cases. The guidelines stipulate that once two weeks of testing with no new positive cases has been completed, visitation can then resume.

In reviewing our timeline to ensure our schedule of visitation aligns with this guidance, we discovered that we still have one more week of testing to complete following our last known positive case reported on Monday, September 14. Because of this, we deeply regret that we must postpone visitation appointments that were made for this week. We will be putting these canceled visits on our priority waiting list and will work to immediately reschedule the appointments when visitation is allowed to resume.

In our first round of surveillance testing, there were no new positive cases reported. If no new cases are reported during this week's second round of testing, we are hopeful to resume Resident and family visits the week of October 5. We will notify you as soon as we can resume visitation.
