

## + Visitor Advisory

### COVID-19 OUTBREAK

In an ongoing effort to ensure the safety and well-being of our Residents, Associates, Family members, and Community visitors, LifeStream has continued to be transparent and honest in our COVID-19 communications.

To that end, it is important that we inform you that our Community is currently in an Outbreak Status of COVID-19 cases. Outbreak status is defined by the Arizona Department of Health Services (ADHS) as one (1) or more active cases of COVID-19/coronavirus.

Because there are one (1) or more cases of active COVID-19 in our community, there is an increase in the risk of being exposed or contracting the virus to everyone, including visitors. It is our desire to make you aware of this risk, and offer guidance for how you can make your visit as safe as possible. LifeStream continues to advise:

- ***Wear a mask at all times*** and anywhere within our community, inside and outside. Masks with a vent or valve are ***NOT*** permitted.
- ***Sanitize your hands frequently*** by washing your hands for 20 seconds or using hand sanitizer.
- ***Observe a 6' Comfort Zone*** for social distancing and *limit physical contact* as much as possible.
- ***Limit your time in close proximity during your visit*** if at all possible. This helps reduce the risk of exposure to COVID-19.
- ***Consider visiting outside*** as this also helps reduce potential exposure.

We are glad you've come to visit your loved-one. Visitation is so important for our Residents. Because there are one or more active cases of COVID-19, we ask that you are even more diligent in adhering to the guidance we've provided here. If you are interested in changing your visit to an outdoor location, please let our team know, and we will do all we can to accommodate that request.
