

# + Policies and Procedures Manual

## *Attachment: COVID Outbreak/Surge Management as of 12-14-20*

---

### **Purpose**

LifeStream's Communities ("Community" or "Communities") will implement procedures to manage Resident illnesses in order to promptly respond to an outbreak (or potential outbreak) of COVID-19 within a LifeStream Community.

### **LifeStream at Cook Health Care (Skilled Nursing)**

- **COVID Recovery Area open:** *Yes. Hall 100. Any Residents who are diagnosed with or suspected to have COVID-19 will be placed on isolation precautions on Hall 100. Hall 100 has 28 beds in 15 separate rooms. Hall 100 has a separate entrance (through the courtyard on the South side of the building) and facilities to support Resident care in a contained environment.*
- **Accepting known-COVID positive new admissions:** *No, except from other LifeStream Communities.*
- **Observation (for new or readmitted Residents):** *New or readmitted Residents coming from a higher acuity facility will be placed on Hall 300. Hall 300 has 22 beds in 12 separate rooms and separate entrance located on the West side of the building.*
- **Containment Overflow:** *If the Community requires additional COVID beds due to widespread outbreak, Hall 200 will be utilized by transferring current Residents to other rooms/beds in the Community. Hall 200 has 24 beds in 12 separate rooms.*

### **LifeStream at Sun Ridge (Skilled Nursing)**

- **COVID Recovery Area open:** *No. Residents who test positive will be transferred to LifeStream at Cook Health Care if space is available.*
- **Accepting known-COVID positive new admissions:** *No.*
- **Observation (for new or readmitted Residents):** *New or readmitted Residents coming from a higher acuity facility will be placed in a room on Station 1 (generally Rooms 153 and 155). Station 1 has capacity to provide care for 10 new/readmitted Residents at one time.*
- **Containment Overflow:** *If the Community requires additional COVID beds due to widespread outbreak, Station 1 will be utilized by transferring current Residents to other rooms/beds in the Community and closing off Station 1 to all but COVID-positive/suspected Residents. There is a separate entrance located on the South side of the building (staff will temporarily enter on the East side of the building). Under this configuration, Station 1 has 10 beds in 6 separate rooms.*

## LifeStream at Youngtown (Assisted Living)

- **COVID Recovery Area open:** No. Residents who test positive will be transferred to LifeStream at Cook Health Care if space is available.
- **Accepting known-COVID positive new admissions:** No.
- **Observation (for new or readmitted Residents):** New or readmitted Residents coming from a higher acuity facility will be placed on isolation and transmission based precautions for 14 days following admission in a private room.
- **Containment Overflow:** If the Community requires COVID beds due to widespread outbreak, Residents' private rooms will be designated for isolation purposes.

## LifeStream at Thunderbird (Assisted Living)

- **COVID Recovery Area open:** No. Residents who test positive will be transferred to LifeStream at Cook Health Care if space is available.
- **Accepting known-COVID positive new admissions:** No.
- **Observation (for new or readmitted Residents):** New or readmitted Residents coming from a higher acuity facility will be placed on isolation and transmission based precautions for 14 days following admission in a private room.
- **Containment Overflow:** If the Community requires COVID beds due to widespread outbreak, Residents' private rooms will be designated for isolation purposes.

## LifeStream at Northeast Phoenix (Assisted Living)

- **COVID Recovery Area open:** No. Residents who test positive will be transferred to LifeStream at Cook Health Care if space is available.
- **Accepting known-COVID positive new admissions:** No.
- **Observation (for new or readmitted Residents):** New or readmitted Residents coming from a higher acuity facility will be placed on isolation and transmission based precautions for 14 days following admission in a private room.
- **Containment Overflow:** If the Community requires COVID beds due to widespread outbreak, Residents' private rooms will be designated for isolation purposes.
